

ProcureAM Unveils New Website

LEVITTOWN, Pa. — December 7, 2021 — Exchange-traded product issuer [ProcureAM](#), a wholly owned subsidiary of Procure Holdings, LLC, announced its newly designed website www.ProcureETFs.com.

“Along with a sleek user interface, website visitors will find fund performance data, informative research papers and videos, blog posts, and the latest company news,” said Procure CEO Andrew Chanin.

ProcureAM introduced the world’s first exchange-traded fund to offer pure-play exposure to the global space economy, the [Procure Space ETF \(TICKER: UFO\)](#), in 2019. UFO tracks (before fees and expenses) the [S-Network Space Index](#), which focuses on companies that are significantly involved in space-related activities. The recent and upcoming launches by Virgin Galactic, Blue Origin and SpaceX continue to bring the growing space sector into the forefront.

For more information about [UFO](#) and to view the new Procure ETFs website, please visit www.ProcureETFs.com.

About ProcureAM

ProcureAM, LLC (ProcureAM) is an innovative exchange-traded product (ETP) issuer based in Levittown, Pennsylvania. Please consider the Funds investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund’s summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest.

Investing involves risk. Principal loss is possible. The Fund is also subject to the following risks: Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns.

Aerospace and defense companies can be significantly affected by government aerospace and defense regulation and spending policies. The exploration of space by private industry and the harvesting of space assets is a business based in future and is witnessing new entrants into the market. Investments in the Fund will be riskier than traditional investments in established industry sectors. The Fund is considered to be concentrated in securities of companies that operate or utilize satellites which are subject to manufacturing delays, launch delays or failures, and operational and environmental risks that could limit their ability to utilize the satellites needed to deliver services to customers. Investing in foreign securities are volatile, harder to price, and less liquid than U.S. securities. Securities of small- and mid-capitalization companies may experience much more price

volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies. The Fund is not actively managed so it would not take defensive positions in declining markets unless such positions are reflected in the underlying index. Please refer to the summary prospectus for a more detailed explanation of the Funds' principal risks. It is not possible to invest in an index.

UFO is distributed by Quasar Distributors LLC.
