

Three Reasons to Consider Investing in the Natural Disaster Economy

60+ NATURAL DISASTER RECOVERY AND PROTECTION COMPANIES, ONE FUND

The Procure Disaster Recovery Strategy ETF (FIXT) is comprised of companies involved in the mitigation, detection, monitoring, recovery and rebuilding efforts related to natural disasters. The FIXT ETF seeks investment results that correspond generally to the performance of the VettaFi Natural Disaster Recovery and Mitigation Index before the Fund's fees and expenses. The FIXT ETF may provide diversification into companies helping our planet protect and recover from natural disasters.

VETTAFI NATURAL DISASTER RECOVERY AND MITIGATION INDEX (VFFEMA)

The VettaFi Natural Disaster Recovery and Mitigation Index is an equal-weighted global index focused on companies involved in the recovery and mitigation of natural disasters. This includes companies with government contracts for natural disaster recovery and mitigation, companies involved with home improvement retail and companies that are materially engaged in emergency/backup power generators and batteries.

PROCURE DISASTER RECOVERY STRATEGY ETF

FIXT ETF

1

From 2002-2022, natural disasters have cost \$424,256,220 per day.¹

2

By 2030, the UN predicts 560 disaster events per year (1.5 each day).²

3

Floods, droughts, wildfires and hurricanes made worse by climate change could cost the U.S. Federal budget about \$2 trillion each year by the end of the century.³

PROCUREAM

ProcureETFs.com | 866-690-ETFS (3837) | info@ProcureETFs.com

ProcureAM is an innovator in the exchange-traded fund (ETF) industry. We listen to our clients and endeavor to provide investors with distinct investment opportunities. Procure Holdings is a holding parent company of diversified subsidiaries specializing in: asset management, consulting services and intellectual property. Our three revenue pillars create a unique opportunity for the development, design, launch and support of exchange traded products (ETPs) and business strategies across the financial products spectrum.

Please consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting www.procureetfs.com or calling 1-866-690-3837. Read carefully before you invest.

This document does not constitute an offer to sell or the solicitation of an offer to buy any security or investment product and should not be construed as such. Fund holdings or allocations are subject to change at any time and should not be considered a recommendation to buy or sell any security. Fund holdings may not equal 100% due to rounding.

Investing involves Risk. Principal loss is possible. Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns.

Natural Disaster/Epidemic Risk - Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments. **Foreign Investment Risks** - Foreign securities are typically more volatile, harder to price, and less liquid than U.S. securities. **American Depositary Receipt Risk (ADR)** - ADRs involve risks like those associated with investments in foreign securities, including changes in political or economic conditions of other countries and changes in the exchange rates of foreign currencies. ADRs listed on U.S. exchanges are issued by banks or trust companies and entitle the holder to all dividends and capital gains paid out on the underlying foreign shares. Investing in ADRs as a substitute for an investment directly in the foreign company shares, exposes the Fund to the risk that the ADRs may not provide a return that corresponds precisely with that of the foreign company's shares. **New Fund Risk** - The Fund is recently organized with no operating history and has no track record on which to base investment decisions. **Non-Diversification Risk** - Because the Fund is "non-diversified," it may invest a greater percentage of its assets in securities of a single issuer or fewer issuers than a diversified fund, which may expose the Fund to the risks associated with the developments affecting the issuers in which the Fund invests. **Passive Management Risk** - The Fund is passively managed and attempts to mirror the composition and performance of the VettaFi Natural Disaster Response and Mitigation Index. The Fund's returns may not match due to expenses incurred by the Fund or lack of precise correlation with the index. **Large-Capitalization Securities Risk** - Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and may not be able to attain the high growth rate of smaller companies, especially during extended periods of economic expansion. **Small and Mid-Capitalization Securities Risk** - The Fund may be subject to the risk that small- and mid-capitalization securities may underperform other segments of the equity market or the equity market as a whole and may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies.

The index is an equal-weighted global index comprised of companies involved in recovery, mitigation, resiliency, response and prevention related to natural disasters such as floods, storms, droughts, wildfires, earthquakes among others.
