

The Procure Space ETF® (UFO) Can Now Be Traded on Coinbase

LEVITTOWN, Pa. — April 7th, 2026 - [ProcureAM](#) is excited to share that the world's first pure-play ETF, the [Procure Space ETF® \(TICKER: UFO\)](#), can now be traded on [Coinbase](#). [UFO](#) will be available to customers in the United States 24 hours a day, 5 days a week.

[Coinbase](#) enables investors to buy and sell exchange-traded funds 24 hours a day, 5 days a week allowing for faster reaction to ever-changing market news. [Coinbase](#) users can now hold crypto, Bitcoin and ETFs in the same application thereby merging traditional financial products with the digital asset economy.

The [Procure Space ETF®](#) was up 14.26% year-to-date as of March 30th, 2026¹ and experienced a record 2025, with the fund's performance increasing 67.94% for the year ending December 31st, 2025.²

[UFO](#) is the first pure-play space ETF dedicated exclusively to companies positioned to benefit from the advancement of space-related technologies and services. The fund provides targeted exposure to firms involved in satellite communications, launch services, space exploration, Earth observation, and other space-enabled applications.

Please consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest.

Investing involves risk. Principal loss is possible.

Aerospace and defense companies can be significantly affected by government aerospace and defense regulation and spending policies. The exploration of space by private industry and the harvesting of space assets is a business based in future and is witnessing new entrants into the

market. Investments in the Fund will be riskier than traditional investments in established industry sectors. The Fund is considered to be concentrated in securities of companies that operate or utilize satellites which are subject to manufacturing delays, launch delays or failures, and operational and environmental risks that could limit their ability to utilize the satellites needed to deliver services to customers. Investing in foreign securities are volatile, harder to price, and less liquid than U.S. securities. Securities of small- and mid-capitalization companies may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies.

UFO is distributed by Quasar Distributors LLC.
