BY WILL MATHIS, FLAVIA ROTONDI, JAMES REGAN

WHAT ARE THE EFFECTS OF DROUGHT?

BY LOUISE WALSH

Things are heating up in Europe, but not for the better. Record setting temperatures are causing and will continue to cause major problems to everyday life such as:

- UK: Restricted train, plane and Tube travel. Power outages and road closures.
- France: Home evacuations due to wildfires.
- Italy: Possible crop output limitations because of drought.
- Netherlands: Extreme heat caused grocery store deliveries to be called off.
- Spain: Fires led to train service issues.

WHAT UK DROUGHT MEANS FOR INVESTORS

BY HANNAH SMITH

Rain rain go away, but please, please, please come another day. Droughts and severe rain pose the biggest climate risks for the UK and Europe over the coming 30 years, according to a recent S&P Global report. This water stress, along with other extreme weather threats such as hurricanes and wildfires, could negatively impact 4.5% of world GDP and physical assets for 66% of the biggest global companies by 2050. Investors and businesses may use this

Additional Information:

Please consider the Funds investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest. Any investment product, strategy, or product design that is described on the Procure ETF's website may not be suitable for all types of clients.

Investing involves risk. Principal loss is possible. The Fund is also subject to the following risks:

Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns. Securities of small- and mid-capitalization companies may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies. The Fund is not actively

managed so it would not take defensive positions in declining markets unless such positions are reflected in the underlying index. Please refer to the summary prospectus for a more detailed explanation of the Funds' principal risks. It is not possible to invest in an index.

Natural Disaster/Epidemic Risk - Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments.

Foreign Investment Risks – Foreign securities are typically more volatile, harder to price, and less liquid than U.S. securities.

This product is neither associated with, nor endorsed by, the Federal Emergency Management Agency.
