

Economic Impact of Natural Disasters

There's No Such Thing as a Disaster-Resistant Place Anymore

By Rachel DuRose

Floods, Fires and Deadly Heat are the Alarm Bells of a Planet on the Brink

By Sarah Kaplan

From record breaking temperatures to ongoing wildfires and major flooding, the planet is in trouble. Human-induced climate change combined with summer and El Niño is leading to more natural disasters than ever before. Trying to prepare for the increasing occurrence of extreme weather events is proving to be difficult. Communities may have to implement mitigation and/or recovery efforts for disasters they have never before experienced and insurance companies are raising prices or withdrawing coverage.

Floods, Heat and Smoke

By German Lopez

The growing prevalence of natural disasters is leading to a global battle for the small number of available resources. States, countries and continents are no longer able to dispense equipment freely during extreme weather events. The United States and Australia battled it out for firefighters and trucks as both dealt with wildfires. While simultaneous flooding in New York and Vermont meant no sharing of resources on either end. Meanwhile, very high temperatures and floods in Pakistan led to a struggle for recovery supplies.

President Joseph R. Biden, Jr. Approves Vermont Emergency Declaration

Vermont Slowly Turns to Recovery After Being Hit by Flood From Slow-Moving Storm

By Lisa Rathke

Talk about throwing some cold water on it. Unprecedented flooding led the Federal Emergency Management Agency to approve disaster relief

help for Vermont. Recovery efforts have been implemented as the state looks to open blocked roads and repair and rebuild homes, businesses, parks and fields. While the exact number is yet to be determined, experts say damages are already in the tens of millions of dollars.

Fund holdings and sector allocations are subject to change at any time and should not be considered a recommendation to buy or sell any security.

Additional Information:

Please consider the Funds investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest. Any investment product, strategy, or product design that is described on the Procure ETF's website may not be suitable for all types of clients.

Investing involves risk. Principal loss is possible. The Fund is also subject to the following risks: Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns. Securities of small- and mid-capitalization companies may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies. The Fund is not actively managed so it would not take defensive positions in declining markets unless such positions are reflected in the underlying index. Please refer to the summary prospectus for a more detailed explanation of the Funds' principal risks. It is not possible to invest in an index.

Natural Disaster/Epidemic Risk - Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments.

Foreign Investment Risks – Foreign securities are typically more volatile, harder to price, and less liquid than U.S. securities.

Procure Disaster Recovery Strategy ETF is distributed by Quasar Distributors LLC.
