

Recent Natural Disaster Activity and Recovery Efforts

World Rocked by 29 Billion-Dollar Weather Disasters in 2022

By Jeff Masters

Climate Change is Causing More Billion-Dollar Weather Disasters

By David Knowles

Natural disasters have become more frequent and costly. So far in 2022, the world has experienced 29 extreme weather events, which have tallied more than \$1 billion in damages, according to Aon's quarterly report. 15 of the disasters took place in the U.S.

In the 1980s there was an average of 82 days between these events, from 2017 to 2021 that number dropped to just 18 days, according to research from Climate Center.

New data attributes the incessant, expensive hurricanes, floods, heatwaves, and wildfires to climate change.

Fund holdings and sector allocations are subject to change at any time and should not be considered a recommendation to buy or sell any security.

Additional Information:

Please consider the Funds investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest. Any investment product, strategy, or product design that is described on the Procure ETF's website may not be suitable for all types of clients.

Investing involves risk. Principal loss is possible. The Fund is also subject to the following risks: Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns. Securities of small- and mid-capitalization companies may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies. The Fund is not actively managed so it would not take defensive positions in declining markets unless such positions are reflected in the underlying index. Please refer to the summary prospectus for a more detailed explanation of the Funds' principal risks. It is not possible to invest in an index.

Natural Disaster/Epidemic Risk - Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments. Foreign Investment Risks – Foreign securities are typically more volatile, harder to price, and less liquid than U.S. securities.

The Procure Disaster Recovery Strategy product is neither associated with, nor endorsed by, the Federal Emergency Management Agency.

Procure Disaster Recovery Strategy ETF is distributed by Quasar Distributors LLC.
