

National Weather Persons Day and FIXT ETF: Perfect Together!

Hats off to our national (and local) weather persons! They are the first line of defense when it comes to warning communities about imminent natural disasters.

Advanced alerts of upcoming weather events like flooding, blizzards, hurricanes, and wildfires enable people to evacuate and prepare structures to withstand damage. Early action results in more lives saved and reduced financial losses.

Companies in [FIXT, The Procure Disaster Recovery Strategy ETF](#), also work to prevent damage from natural disasters. Early warning systems from Hexagon* can alert residents to impending disasters. Verisk* provides evaluation of communications centers and response procedures. Home improvement stores like Home Depot* and Lowe's* can stock up on needed supplies to withstand weather events. Enersys* and Generac* provide battery and energy backup. Clean Harbors* assists with debris removal, emergency pump outs, and flood water management. Tetra Tech* provides consulting and engineering for dams, seawalls, and reservoirs for flood protection.

Thank you, Weather Persons, for helping communities stay safe.

*As of January 30th, 2024, Clean Harbors (CLH) was a 2.00% holding, Enersys (ENS) was a 2.15% holding, Generac (GNRC) was a 1.91% holding, Hexagon (HEXAB SS) was a 2.08% holding, Home Depot (HD) was a 2.19% holding, Lowe's (LOW) was a 2.00% holding, Tetra Tech (TTEK) was a 1.95% holding, Verisk Analytics (VRSK) was a 2.06% holding in the Procure Disaster Recovery Strategy ETF (NASDAQ: FIXT).

Please consider the Funds investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest.

Investing involves risk. Principal loss is possible.

Natural Disaster/Epidemic Risk - Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments. **Foreign Investment Risks** – Foreign securities are typically more volatile, harder to price, and less liquid than U.S. securities. **American Depositary Receipt Risk (ADR)** - ADRs involve risks like those associated with investments in foreign securities, including changes in political or economic conditions of other countries and changes in the exchange rates of foreign currencies. ADRs listed on U.S. exchanges are issued by banks or trust companies and entitle the holder to all dividends and capital gains paid out on the underlying foreign shares. Investing in ADRs as a substitute for an investment directly in the foreign company shares exposes the Fund to the risk that the ADRs may not provide a return that corresponds precisely with that of the foreign company's shares. **Non-Diversification Risk** - Because the Fund is "non-diversified," it may invest a greater percentage of its assets in securities of a single issuer or fewer issuers than a diversified fund, which may expose the Fund to the risks associated with the developments affecting the issuers in which the Fund invests. **Passive Management Risk** - The Fund is passively managed and attempts to mirror the composition and performance of the VettaFi Natural Disaster Recovery and Mitigation Index. The Fund's returns may not match due to expenses incurred by the Fund or lack of precise correlation with the index. **Large-Capitalization Securities Risk** - Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and may not be able to attain the high growth rate of smaller companies, especially during extended periods of economic expansion. **Small and Mid-Capitalization Securities Risk** - The Fund may be subject to the risk that small- and mid-capitalization securities may underperform other segments of the equity market or the equity market as a whole and may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies.

The index is an equal-weighted global index comprised of companies involved in recovery mitigation, resiliency, response, and prevention related to natural disasters such as floods, storms, droughts, wildfires, earthquakes among others.

The Procure Disaster Recovery Strategy ETF is neither associated with, nor endorsed by, the Federal Emergency Management Agency.
