Harris announces \$5.8 billion for water infrastructure projects, says clean water is a right

The White House is allocating another \$5.8 billion for water infrastructure upgrades across the United States. \$3.2 billion is earmarked for the Drinking Water State Revolving Fund and another \$1 billion for the Great Lakes to provide clean drinking water. While over \$200 million will be used to improve storm drains, water mains, and lead pipes in Pennsylvania. States have received \$22 billion for water infrastructure projects so far. Companies such as Xylem*, Evoqua Water Technologies*, Ecolab*, and Clean Harbors* provide water treatment solutions to help make water systems operational and weather resilient.

'Life-threatening' storm system batters California, with flooding and high winds

By Gabrielle Canon

Intense bursts of rain threaten flooding and landslides in LA area as storm hands California its final soaking

By Elizabeth Wolfe and Mary Gilbert

Major storms wreaked havoc across California in February. Powerful winds and rain led to flooding, downed power, airport closures, mudslides, and inaccessible roads. A state of emergency was declared with evacuations carried out and essential resources such as sandbags and high-water vehicles set aside.

'Category 5' was considered the worst hurricane. There's something scarier, study says.

By Dinah Voyles Pulver

Five is no longer enough when it comes to classifying hurricanes. Global warming is leading to cyclones so powerful that a new Category 6 rating may be required, according to a report from the National Academy of Sciences. Researchers found that in the last decade alone five storms exceeded the 193 miles per hour threshold to qualify as a Category 6.

Additional Information:

Please consider the Funds investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest. Any investment product, strategy, or product design that is described on the Procure ETF's website may not be suitable for all types of clients.

Investing involves risk. Principal loss is possible. The Fund is also subject to the following risks: Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns. Securities of small- and mid-capitalization companies may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies. The Fund is not actively managed so it would not take defensive positions in declining markets unless such positions are reflected in the underlying index. Please refer to the summary prospectus for a more detailed explanation of the Funds' principal risks. It is not possible to invest in an index.

Natural Disaster/Epidemic Risk - Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments.

Foreign Investment Risks – Foreign securities are typically more volatile, harder to price, and less liquid than U.S. securities.
