Where sinking cities are pushing sea level rise into overdrive

By Rachel Ramirez

Sea levels are rising and cities along the US coastline are sinking at a worrisome rate. According to a new study from Virginia Tech and the U.S. Geological Survey, land is lowering five millimeters, while seas are going up three millimeters a year. This concerning trend could cause 343,000 acres and 1 in 50 people in 32 cities to be affected by extreme flooding by 2050 due to hurricanes, storms and waterside erosion.

AccuWeather warns of 'super-charged' 2024 hurricane season

By Ezra Amacher

An extremely busy upcoming hurricane season is expected thanks to warm ocean temperatures and the reappearance of La Nina. AccuWeather meteorologists are predicting numerous tropical storms in 2024. Implementing more resilient infrastructure and water management systems may help prevent or mitigate the damages caused by these strong hurricanes.

Insured losses could double in next ten years: Swiss Re sigma

By Steve Evans

Natural disasters caused \$100 billion in insured losses in 2023, \$64 billion of which was from severe convective storms, according to Swiss Re. Insured extreme weather losses has grown 5% to 7% since 1994, but that number may double over the next ten years. Stronger and more frequent disasters, such as floods and storms, are driving this unfortunate growth trend.

Fund holdings and sector allocations are subject to change at any time and should not be considered a recommendation to buy or sell any security.

Additional Information:

Please consider the Funds investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest. Any investment product, strategy, or product design that is described on the Procure ETF's website may not be suitable for all types of clients.

Investing involves risk. Principal loss is possible. The Fund is also subject to the following risks: Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns. Securities of small- and mid-capitalization companies may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies. The Fund is not actively managed so it would not take defensive positions in declining markets unless such positions are reflected in the underlying index. Please refer to the summary prospectus for a more detailed explanation of the Funds' principal risks. It is not possible to invest in an index.

Natural Disaster/Epidemic Risk - Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments.

Foreign Investment Risks – Foreign securities are typically more volatile, harder to price, and less liquid than U.S. securities.
