New report finds investing in resilience saves jobs and incomes

Spending on efforts to strengthen communities from extreme weather events can lead to substantial savings in the future. According to a new report by Allstate, the U.S. Chamber of Commerce, and the U.S. Chamber of Commerce Foundation, investing \$1 on disaster resiliency saves jobs and \$13 in potential damages. Measures to help prepare for natural disasters include home and business infrastructure updates, wetlands restoration, and building barrier walls and floodgates.

Why this summer's forecast is bad news for the US after an exceptionally disastrous start to the year

By Ella Nilsen and Mary Gilbert

With \$25 billion in natural disasters having already occurred and even more extreme weather on the horizon this year, the Federal Emergency Management Agency may be running out of money. Funding from FEMA is vital for recovery efforts from events including severe storms, hurricanes, and heat waves.

Extreme heat, smoke should get US disaster label, groups say

By Jennifer A. Dlouhy

Environmental and healthcare groups lobbied the Federal Emergency Management Agency to recognize heat and wildfire smoke as 'major disasters.' The new classification would provide financing for air filtration, solar systems, cooling centers, building insulation and more. Activists say funding is necessary to protect against and mitigate damages from recurring severe heat and smoke.

Biden-Harris Administration invests \$4.55 million for community heat resilience

\$4.55 million was allocated by the Department of Commerce and National Oceanic and Atmospheric Administration to combat heat. Two virtual centers will be created to monitor and analyze extreme heat and develop plans to help communities become more resilient from the effects of sky-high temperatures.

Extended power outage that hit Puerto Rico angers and worries many during heat advisories

By Coral Murphy Marcos

Summer began with a series of extreme weather events across the US:

- Intense heat blanketed large areas of the United States leading many cities to open cooling centers.
- Major storms caused flooding in the Southeast shutting down roads, swamping houses, and causing power outages.
- Wildfires spread across California torching 36,145 acres.
- Puerto Rico's residents experienced lingering power outages while temperatures soared

Additional Information:

Please consider the Funds investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest. Any investment product, strategy, or product design that is described on the Procure ETF's website may not be suitable for all types of clients.

Investing involves risk. Principal loss is possible. The Fund is also subject to the following risks: Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns. Securities of small- and mid-capitalization companies may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies. The Fund is not actively managed so it would not take defensive positions in declining markets unless such positions are reflected in the underlying index. Please refer to the summary prospectus for a more detailed explanation of the Funds' principal risks. It is not possible to invest in an index.

Natural Disaster/Epidemic Risk - Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments.

Foreign Investment Risks – Foreign securities are typically more volatile, harder to price, and less liquid than U.S. securities.

Procure Disaster Recovery Strategy ETF is distributed by Quasar Distributors LLC.
