Canada on Track for its Worst-Ever Wildfire Season

What Wildfire Smoke Does to the Human Body

By Alejandro de la Garza

Wildfires raged in Canada inflicting a historic amount of damage and blanketing the United States in smoke. The fires burned millions of acres and led to hundreds of thousands of displacements. Air quality alerts were issued across the US causing Americans to remain inside. Exposure to smoke can be extremely harmful to health with risks including poor lung development, heart disease and asthma attacks.

Natural Disaster Mitigation & Recovery: Opportunity or Opportunity Cost

By Elias Azrak and Rajesh Jain

Natural disasters led to nearly \$224 billion in losses in 2022, says the Emergency Event Database EM-DAT. With extreme weather events occurring more often and causing increased damages, it has become more important than ever to distribute resources in mitigation and recovery efforts. Investing in companies offering prevention services and technologies may offer several benefits including portfolio diversification, participation in a growing sector, and having a positive

An Inevitable Growth Market in Disaster Relief

By Brett Eversole

From hurricanes to wildfires, extreme weather events are occurring at an alarming rate. Recovering from damages and implementing mitigation measures is costly. The White House predicts natural disasters will cost \$2 trillion per year by the end of the century. The **Procure Disaster Recovery Strategy ETF (NASDAQ: FIXT)** provides investors with the opportunity to invest in the quickly increasing disaster recovery and prevention sector. FIXT tracks a portfolio of companies engaged in mitigating and recovering from natural disasters.

Important Information:

Please consider the Funds investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest. Any investment product, strategy, or product design that is described on the Procure ETF's website may not be suitable for all types of clients.

Investing involves risk. Principal loss is possible. The Fund is also subject to the following risks: Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns. Securities of small- and mid-capitalization companies may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies. The Fund is not actively managed so it would not take defensive positions in declining markets unless such positions are reflected in the underlying index. Please refer to the summary prospectus for a more detailed explanation of the Funds' principal risks. It is not possible to invest in an index.

Natural Disaster/Epidemic Risk - Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments.

Foreign Investment Risks – Foreign securities are typically more volatile, harder to price, and less liquid than U.S. securities.

Procure Disaster Recovery Strategy ETF is distributed by Quasar Distributors LLC.
