MDA Space to build 27 more satellites for expanded Telesat network

Source: www.marketwatch.com

While the rest of us were putting our out-of-office replies on for the last days of summer, Telesat* and MDA Space* were busy locking in another big deal. Telesat landed a \$2.3 billion CAD contract from Canada's Defence Investment Agency, the largest deal in the company's history, to bolster military communications across the Arctic and other high-latitude regions. MDA Space will receive \$474 million CAD to build 27 extra satellites for Telesat's increased low-Earth orbit constellation.

SpaceX lands \$1.6 billion Space Force contract for military sensing satellite launches

By Neetika Walter

Summer blockbusters were still packing theaters, but SpaceX* booked one of the biggest sequels of the season in orbit. The company landed \$1.6 billion in orders from the U.S. Space Force to fly 18 Falcon 9 missions through 2027, carrying Pentagon satellites that will detect and target airborne objects. The award pushes SpaceX past \$7 billion in Pentagon contracts so far in 2026.

Space Force awards 15 spots on \$981M test, training contract

By Jane Edwards

NFL preseason kicked off with the Hall of Fame Game, but the U.S. Space Force was busy building a roster of its own. The Space Force awarded 15 companies, including Boeing*, Firefly Aerospace*, L3Harris Technologies*, Lockheed Martin*, Northrop Grumman*, Redwire*, Rocket Lab*, Viasat*, and York Space Systems*, positions on a potential \$981 million indefinite-delivery, indefinite-quantity (IDIQ) contract to develop test and range capabilities for the National Space Test and Training Complex.

Moonshot to Money: Intuitive Machines lands \$600M defense win

By Jeffrey Neal Johnson

As Major League Baseball pennant races heated up, Intuitive Machines* was scoring more wins of its own. The company received authorization for a \$600 million multi-satellite communications infrastructure program. Under the agreement, Intuitive Machines will design, manufacture, integrate, and support multiple spacecraft using its proprietary IM 1300 satellite platform.

Rocket Lab snags \$397 million Space Force contract

By Lekha Gupta

As kids traded beach bags for backpacks and headed back to school, Rocket Lab* picked up its own homework: a \$397 million U.S. Space Force contract to build, launch, and operate a fleet of next-generation flat satellites equipped with sensors and high-bandwidth communications.

Rocket Lab, Amazon win Space Force contracts

By Mark Holmes

As the U.S. Open served up its opening rounds, the Space Force served up new contracts. Lockheed Martin*, Northrop Grumman*, Rocket Lab*, York Space Systems*, and Amazon* received \$12 million each under the Space Data Network program to build "Space Exchange Point" satellites and demonstrate interoperable data connectivity across orbit.

Important Information

For a complete list of holdings in UFO, visit: <https://procureetfs.com/ufo/>. Fund holdings and sector allocations are subject to change at any time and should not be considered a recommendation to buy or sell any security.

Please consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest. This and other important information is contained in the Fund's summary prospectus and prospectus, which can be obtained by visiting procureetfs.com. Read carefully before you invest.

Investing involves risk. Principal loss is possible. The Fund is also subject to the following risks: Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns.

Aerospace and defense companies can be significantly affected by government aerospace and defense regulation and spending policies. The exploration of space by private industry and the harvesting of space assets is a business based in future and is witnessing new entrants into the market. Investments in the Fund will be riskier than traditional investments in established industry sectors. The Fund is considered to be concentrated in securities of companies that operate or utilize satellites which are subject to manufacturing delays, launch delays or failures, and operational and environmental risks that could limit their ability to utilize the satellites needed to deliver services to customers. Investing in foreign securities are volatile, harder to price, and less liquid than U.S. securities. Securities of small- and mid-capitalization companies may experience much more price volatility, greater spreads between their bid and ask prices and significantly lower trading volumes than securities issued by large, more established companies. The Fund is not actively managed so it would not take defensive positions in declining markets unless such positions are reflected in the

underlying index. Please refer to the summary prospectus for a more detailed explanation of the Funds' principal risks. It is not possible to invest in an index.

UFO is distributed by Quasar Distributors LLC.
